Next meeting:

2600 Meetings exist as a forum for all interested in technology to meet and talk about events in technology-land, learn, and teach. Meetings are open to anyone of any age or level of expertise and occur globally.

Meetings are free, unstructured and informal, with like-minded individuals gathering together over a few drinks at 6pm on the 1st Friday of every month.

Typical attendees include system / database administrators, technology enthusiasts, gamers, programmers, network engineers, IT managers, students, business owners, security / privacy / liberty advocates, blackhat / whitehat hackers, physical and covert surveillance and bug sweepers, amateur radio operators, IT security consultants, electronic forensic and data recovery specialists.

Attendees often include journalists, recruiters, solicitors... even law enforcement (so be careful what you say! >:)

All are welcome – hope to see you there!
